PAY AS LITTLE AS  
**\$35**  
PER PRESCRIBED INPEN\*

\*Each InPen is reusable for one year, offer available to eligible patients with commercial insurance. Terms and conditions apply. See back for details.

## An insulin pen, but smarter.

**InPen is the only smart insulin delivery system combining a reusable, Bluetooth®-enabled insulin pen with an intuitive mobile app to help people with Type 1 or Type 2 diabetes take the right amount of insulin, at the right time.**

Compatible with Novolog®, Humalog®, and Fiasp® cartridges

Connects to the app via Bluetooth®

Monitors insulin temperature

Battery lasts a full year with no need to charge

Delivers half-unit doses

For the first time ever, you can have the freedom of an insulin pen without sacrificing data and decision support. InPen fundamentally changes how you manage MDI because it tracks your data and gives you personalized recommendations to help you make smarter decisions and achieve better results.

# The InPen App

The screenshot shows the 'Calculate Dose' screen of the InPen app. At the top, the time is 5:45. The main heading is 'Calculate Dose'. Below this, the current glucose level is 118 mg/dL and the active insulin is 4.0 U. A graph shows glucose levels from 6 AM to NOW, with a blue area representing active insulin. Below the graph is a 'Today' log with entries for insulin doses and glucose readings. The bottom navigation bar includes HOME, LOGBOOK, REPORTS, and SETTINGS. Callouts point to various features: 'Calculates personalized doses' points to the 'Calculate Dose' header; 'Tracks active insulin' points to the '4.0 U' value; 'Syncs with CGMs and blood glucose meters' points to the graph; 'Reminds you to dose' points to a yellow alarm icon; 'Automatically logs doses' points to the 'Today' log; and 'Creates shareable reports with up to 90 days' data' points to the 'REPORTS' icon in the bottom navigation bar.

Calculates personalized doses

Tracks active insulin

Syncs with CGMs and blood glucose meters

Reminds you to dose

Automatically logs doses

Creates shareable reports with up to 90 days' data

# InPen works smarter, so you don't have to.

- ✓ Records your active insulin
- ✓ Calculates insulin doses
- ✓ Missed dose reminder
- ✓ Long-acting insulin reminder
- ✓ Blood glucose check reminder
- ✓ Insulin expiration & temperature alerts
- ✓ Shareable reports for healthcare team
- ✓ Integrates with CGM and BGM
- ✓ Reusable for one year - no charging needed
- ✓ Pair multiple InPens to the app
- ✓ Convenient for travel and physical activities
- ✓ Delivers half units

1/2-unit dosing positively affects A1c and blood glucose variability.<sup>1</sup>

60% of insulin doses are taken with some insulin-on-board.<sup>2</sup>

2/3 of people need help calculating their insulin doses.<sup>2</sup>

A bolus calculator is associated with 0.7-1% reduction in A1c.<sup>3</sup>

## Insights Report

Before each visit with your healthcare provider, simply email or fax your report from the app. With integrated, reliable diabetes data the conversation with your healthcare provider has never been easier.

# Meal therapy modes

**Take the right amount of insulin at the right time – InPen now offers three standard modes to help you manage your diabetes:**

## Carb Counting

Traditional insulin management carb counting with a truly smart calculator that considers active insulin and blood glucose trends.

## Meal Estimation

Meal size estimation makes it easier for you to take the correct amount of insulin without the hassle of counting carbs.

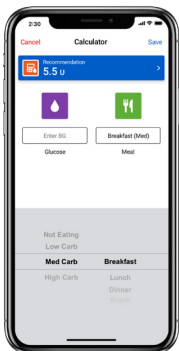

## Fixed Dose

Do you use a fixed dose of insulin? InPen keeps track of your active insulin to adjust the right amount to reach the dose equivalent.

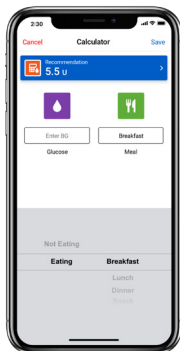

### CARB COUNTING

### MEAL ESTIMATION

### FIXED DOSE

We have reduced the guesswork from insulin dosing to help you feel safer and more in control, regardless of your insulin regimen or carb counting expertise.

**\*Terms and Conditions:** Eligibility Requirements for InPen™ Patient Access Program: Open to uninsured patients and patients with commercial prescription insurance and who are not enrolled in any government-funded program that pays for prescription devices or treatments. Excluded participants include patients enrolled in any federal, state, or government-funded healthcare program such as Medicare, Medicare Advantage, Medicare Part D, Medicaid, Medigap, Veterans Affairs (VA), the Department of Defense (DoD) or TRICARE® that provides coverage for InPen, or where prohibited by law. Cash Discount Cards and other non-insurance plans are not valid as primary under this offer. If at any time a patient becomes enrolled under any such federal, state, or government-funded healthcare program, he/she will no longer be able to use this program and must call 844-843-7903 to stop participation. Restrictions may apply. Offer subject to change or discontinuation without notice. This is not health insurance. Offer applies to a maximum of 2 prescribed InPens per Patient per benefit year. Offer good only in the USA at participating pharmacies and cannot be redeemed at government-subsidized clinics.

The InPen is a home-use reusable pen injector for single-patient use by people with diabetes under the supervision of an adult caregiver, or by a patient age 7 and older for the self-injection of a desired dose of insulin and for calculating an insulin dose or carbohydrate intake based on user entered data. A healthcare professional must assist in dosage programming of the device prior to use, based on various patient-specific criteria and targets. The InPen requires a prescription. For additional product and safety information, please consult the Instructions for Use and [www.companionmedical.com/important-safety-information](http://www.companionmedical.com/important-safety-information). For additional product and safety information, please consult the user guide.
