# An insulin pen, but smarter.

**Learning to manage life with diabetes is hard. We get that.**

InPen is the only smart insulin delivery system combining a reusable, Bluetooth®-enabled insulin pen with an intuitive mobile app to help children with diabetes take the right amount of insulin, at the right time. This affordable solution will help you take control of your child's diabetes.

Share data from multiple InPens to the same app.

Compatible with Novolog®, Humalog®, and Fiasp® cartridges

Connects to the app via Bluetooth®

Monitors insulin temperature

Battery lasts a full year with no need to charge

Delivers half-unit doses

# The InPen App

Calculates personalized doses

Tracks active insulin

Integrates with CGM and BGM

Reminds you to dose

Automatically logs doses

Connects to multiple InPen devices for combined data overview

Creates shareable reports with up to 90 days' data

## Insights Report

**The new Insights Report is a revolution in MDI reporting, offering data traditionally only available to pump users. Free for every InPen user!**

Before each visit with your healthcare provider, simply email or fax your report from the app. With integrated, reliable diabetes data the conversation with your healthcare provider has never been easier.

# InPen works smarter, so you don't have to.

For the first time ever, your child can have the freedom of an insulin pen without sacrificing data and decision support. InPen fundamentally changes how you manage your child's insulin injections because it captures their data and offers personalized recommendations to help you and your child make smarter decisions and achieve better results.

## KEY FEATURES

Records your active insulin

Calculates insulin dose

Missed dose reminder

Long-acting insulin reminder

Blood glucose check reminder

Insulin expiration & temperature alerts

Shareable reports for healthcare team

Integrates with CGMs and BGMs

Reusable for one year - no charging needed

Pair multiple InPens to the app

Convenient for travel and physical activities

# Three Insulin Therapy Settings

Calculate the right amount of insulin at the right time – InPen now offers three standard modes to help you manage your child’s diabetes:

## Carb Counting

Traditional insulin management carb counting with a truly smart calculator that considers active insulin and blood glucose trends.

## Meal Estimation

Meal size estimation makes it easier for users to take the correct amount of insulin without the hassle of counting carbs.

## Fixed Dose

Does your child use a fixed dose of insulin? InPen keeps track of their active insulin to adjust the right amount to reach the dose equivalent.

CARB COUNTING

MEAL ESTIMATION

FIXED DOSE

We have reduced the guesswork and the calculations from insulin dosing to help you feel more safe and in control, regardless of your child’s insulin regimen or carb counting expertise.

**\*Terms and Conditions:** Eligibility Requirements for InPen™ Patient Access Program: Open to uninsured patients and patients with commercial prescription insurance and who are not enrolled in any government-funded program that pays for prescription devices or treatments. Excluded participants include patients enrolled in any federal, state, or government-funded healthcare program such as Medicare, Medicare Advantage, Medicare Part D, Medicaid, Medigap, Veterans Affairs (VA), the Department of Defense (DoD) or TRICARE® that provides coverage for InPen, or where prohibited by law. Cash Discount Cards and other non-insurance plans are not valid as primary under this offer. If at any time a patient becomes enrolled under any such federal, state, or government-funded healthcare program, he/she will no longer be able to use this program and must call 844-843-7903 to stop participation. Restrictions may apply. Offer subject to change or discontinuation without notice. This is not health insurance. Offer applies to a maximum of 2 prescribed InPens per Patient per benefit year. Offer good only in the USA at participating pharmacies and cannot be redeemed at government-subsidized clinics.

The InPen is a home-use reusable pen injector for single-patient use by people with diabetes under the supervision of an adult caregiver, or by a patient age 7 and older for the self-injection of a desired dose of insulin and for calculating an insulin dose or carbohydrate intake based on user entered data. A healthcare professional must assist in dosage programming of the device prior to use, based on various patient-specific criteria and targets. The InPen requires a prescription. For additional product and safety information, please consult the Instructions for Use and [www.companionmedical.com/important-safety-information](http://www.companionmedical.com/important-safety-information). For additional product and safety information, please consult the user guide.
